Professional BookKeeping Services

IIS Integrated International Services

A bridge over troubled waters.

PBS acts a partner in international business by bridging the gaps and easing the pains too often created by differences in legislation, culture, customs, currency and languages when one trades farther afield.

By means of our **Integrated International Services (IIS)**, clients may rely on us to provide them with invaluable support when creating, developing and managing businesses **wherever they may be**.

We offer a **single point of contact**, dealing directly with our local partners abroad, or with clients' own people there when appropriate, and reporting in either standard or specially personalized formats, centralizing consultation on all local issues in host countries and taking care of matters such as compliance with local labour or mercantile regulations, provision of employment contracts, payroll, accounting and human

resource issues and payments of salary, remission to local authorities, and related matters, constantly accessing and providing information, following-up and responding to clients in a timely and professional manner to best defend their interests.

Our **web platform** allows for all of the information to be organized in a structured manner, offering simple, secure and permanent access.

IIS **eliminates language barriers** by dealing with contacts directly in English, while reporting to clients in the language of their choice.
